KEY ACHIEVEMENTS

98% API Latency Reduction Cut response time from 500ms-1s to 2-10ms at Omise	Open-Source Author Created IoRedis for Dart and Dox Framework
PDF/X-4 Compliance Production-grade PDF system with CMYK support	Framework Creator Built Dox, backend framework for Dart
Team Leadership Led teams and mentored junior developers	Cross-Platform Polyglot 7+ languages, 3 cloud platforms

EXPERIENCE

Lead Software Engineer Southeast Asia Development, Hong Kong - Engineered production-grade PDF printing app compliant with PDF/X-4 standards, processing 10,000+ documents monthly - Led a team of 5 engineers, delivering end-to-end software projects on schedule using agile methodologies - Mentored 3 junior developers through 100+ code reviews and pair programming sessions Node.jsTypeScriptReactpdf-libAWS Docker	Oct 2023 - Present
Software Engineer Omise, Bangkok, Thailand - Owned and maintained 6+ payment platform SDKs and plugins across WooCommerce, Shopify, Magento, PHP, Node.js, and Go - Architected caching and query optimizations that reduced API latency by 98% (500ms-1s down to 2-10ms) - Shipped responsive merchant-facing interfaces, reducing integration time by 40% GoPHPNode.jsWooCommerceShopifyRedis	Jul 2022 - Oct 2023
Senior Backend Developer Develop Now / Hungry Now, Bangkok, Thailand - Built and scaled backend for food delivery platform serving 1,000+ daily orders using Laravel, MySQL, Node.js, Socket.IO - Designed 20+ RESTful APIs consumed by web and mobile clients - Architected real-time driver location tracking with Socket.IO, supporting 500+ concurrent connections LaravelNode.jsSocket.IOMySQL	Sep 2021 - Jul 2022
Mid PHP Developer Befeni GmbH, Bangkok, Thailand - Developed full-stack production management system with Laravel, Vue.js, MySQL, tracking 5,000+ garment orders - Integrated 3 mail and payment modules, reducing order-to-delivery processing time by 30% - Built Cordova-based mobile app for barcode scanning, used by 50+ factory staff LaravelVue.jsMySQLCordova	Aug 2019 - Sep 2021
Junior PHP Developer TR Cloud, Bangkok, Thailand - Contributed to cloud-based accounting system serving 200+ business clients, implementing 30+ features - Resolved 100+ bugs and delivered features consistently under tight deadlines in agile environment PHPJavaScriptMySQL	Mar 2018 - Aug 2019

EDUCATION

B.E. Electronics & Communication TU Myitkyina, Myanmar	2016
B.Tech Electronics & Communication TU Myitkyina, Myanmar	2015

OPEN-SOURCE CONTRIBUTIONS

PDFMe ★ 4.1k TypeScript/React PDF generation library - Implemented CMYK/RGB color space support for print-ready output - Added PDF image embedding and text formatting - Built output intent profiles for PDF/X standard compliance
IoRedis for Dart High-performance Redis client for Dart, authored from scratch
Dart On Dox Full-featured backend framework for Dart, inspired by NestJS/Laravel
Search JS Lightweight, framework-agnostic instant search UI component
Country List ★ 59 Comprehensive country dataset with dial codes, flags, and metadata

WHAT PEOPLE SAY

<i>"AJ is one of the most reliable engineers I've worked with. He took ownership of our PDF system and delivered production-grade quality that exceeded expectations."</i> Christian Koch - Product Owner, SBE
<i>"His contributions to our SDK ecosystem were outstanding. AJ reduced our API latency by 98% and consistently delivered clean, well-tested code."</i> Daniel Fowler - Engineering Manager, Omise
<i>"AJ built our entire production management system from the ground up. His work on the barcode scanning app transformed how our factory staff tracked orders."</i> Renke Marten Schulz - Engineering Manager, Befeni GmbH
